

Taping tool **KTHB Micro**

SMALLEST, MOBILE TAPING MACHINE

The KTHB Micro makes taping and spot taping incredibly easy, even on the assembly board. This machine is the first step towards reproducible quality compared with manual taping. Consistent tape tension and an ergonomic motion lead to a uniform slope and wrinkle-free surface.

YOUR BENEFITS

Time savings through continuous taping process

- Higher rotational speed with continuous hand movement
- Integrated cutting device

Developed for production of shorter tape lengths

- Processes conventional adhesive tape widths up to 19mm and a tape core diameter of 1,5" or 1,25"

High quality in a manually guided process

- Consistent tape tension and guiding guarantee wrinkle-free taping
- Controlled process through constant hand motion with the mobile device

Application	for all taping and spot taping processes, can also be used directly on form and assembly boards
Tape material	all conventional adhesive tapes
Tape width	9 – 19 mm
Tape core diameter	1.5" or 1.25", optional 1"
Required distance between harness and board	100 mm
Taping diameter	3 – 20 mm
Dimensions (W×H×D)	155 × 250 × 30 mm
Weight	0.36 kg
